

# Gettysburg National Military Park

## Boundary & Historic Districts

-  Daniel Lady Farm
-  Roads
-  Waterbodies and Streams
-  Gettysburg Borough Boundary
-  Gettysburg Borough Historic District
-  Gettysburg NMP Boundary
-  Gettysburg Battlefield Historic District (Includes the entire Borough of Gettysburg)
-  Other Historic Districts related to the Gettysburg Campaign
-  American Battlefield Protection Program (ABPP) Study Areas
-  American Battlefield Protection Program (ABPP) Core Areas
-  Township Boundary
-  Proposed Fruit Belt Historic District

NOTE: ABPP Study and Core Area boundaries delineate the historical extents of the battlefield. The Study Area defines the tactical context and visual setting of the battlefield and contains all places related to or contributing to the battle event. The Core Areas are the areas of direct combat and are made up of places where combat engagements and key associated actions and features were located. All Core Areas fall fully within the Study Area.

The historic districts were compiled from the most recent National Register maps. Property lines are used based upon the County of Adams, GIS and Mapping Dept. digital files. The park boundary is based upon a combination of sources, the most reliable of which is GPS measurements made at existing boundary monuments. This map was prepared by the USDI NPS GNMP RMD GIS Office on the 8th of August in 2018. Core and Study Area boundaries were provided by the NPS ABPP office.
